DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

The information disclosure statement (IDS) submitted on 3/14/2005 has been considered by the examiner.

Specification

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Allowable Subject Matter

Claims 12-31 are allowable.

The following is an examiner's statement of reasons for allowance: Claims 12-31 are allowed over the prior art of record. The prior art of record, considered individually or in combination, fails to fairly show or suggest the claimed amplifier comprising, among other limitations, a novel and unobvious limitation of "at least one secondary stage amplifier, which is connected in parallel to the main stage amplifier between the RF input and the RF output, wherein the secondary stage amplifier comprises: an input bipolar transistor having at least one of a collector terminal and an emitter terminal high frequency-coupled to the RF input; an output bipolar transistor having a base terminal

high frequency-coupled to the base terminal of the input bipolar transistor, the output bipolar transistor having at least one of a collector terminal and an emitter terminal high frequency coupled to the RF output, wherein the output bipolar transistor is further operably coupled to a supply voltage terminal" structurally and functionally interconnected with other limitations in the manner as cited in claims 13-31.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Cited References

The prior art made of record and not replied upon is considered pertinent to application's disclosures. The cited references relate to high frequency amplifiers.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LAM T. MAI whose telephone number is (571)272-1807. The examiner can normally be reached on 6:00 am - 4:00pm.
